Bot. Y. 145, f. 13.

Dear Sir

many thanks for the Communication. Allegh. as you have inscribed it ex dono auctoris. I suppose there would be no impropriety in my addressing to him a note of thanks?

I send you a piece of my leguminous plant - the memo. I made on the Specimen I otherwise why as follows:

Glycine, bilobea?

Caule volubili, striato, piloso, foliis ternatis, foliolis ellipticis sub-rhomboideis, membranaceis, integris, supremo ipsum, subtus frequenter pubescentibus, terminali majore; petiolulis hirsutissimis apice incrassatis, stipulis triangularibus striatis; pedunculis axillaribus sub-bifloris

bracteis subulatis; calyce gamosepalo
bilobo – lobo superiore longiore
bidentato emarginatove, inferiore
denticulo tricuspidato subulato; corolla
purpureo-violacea, papilionacea;
vexillum reflexum, alae appendiculatae
carinâ brevioribus, unguiculatae;
carinâ acutâ genitalia includens;
staminum distinctione diadelphae 9–1
perigyna; stylus unus elongatus, stigmate
obtuso viridi; ovarium à stylo pedicellatum,
sericeo-hirsutum album, leguminibus
uniloculare, ~~plurimis~~ non interruptum,
seminibus reniformibus 11–12

I also send a flower brought home
by Dr Parry the other night from a party;
I have not seen the leaf, but have
no doubt it is a Echeveria gibbiflora

In faithfully
A. Gray
